

PoleCat is a low cost option for providing a 'blanket coverage' approach to street surveillance. Having remotely accessible onboard recorders built in, **PoleCat** units can be easily mounted on street furniture to provide multi-view surveillance coverage and recording within a single unit.

A standard **PoleCat** is configured with two day/night vandal resistant dome cameras on either side, a 360° dome camera with a 10:1 zoom lens and a covert pinhole camera that offers increased protection if the unit is attacked.

PoleCat also incorporates a 3G and Wi-Fi accessible DVR unit with, as standard, 320 GB of recording storage, with the option to upgrade to a Tera-Byte if required. All housed within a purpose built metal enclosure which provides adequate protection to the equipment when deployed in vulnerable situations.

- Purpose built metal enclosure – IP68 rated
- Vandal Resistant Design – anti vandal domes
- Covert pinhole camera
- 360° PTZ Camera with a 10:1 Zoom lens
- Easy deployment – Universal mountings
- Up to 1 Tera-Byte Onboard Digital Recording
- Low Profile Unobtrusive Wireless Antennae
- Optional COFDM & MESH Transmission
- Wi-Fi accessible – for live monitoring and downloading recordings
- 3G Connectivity – for remotely accessible monitoring via the mobile phone network

Options:

- 100fps recording rate
- 10x Pan Tilt Zoom module
- 320MB, 500MB or 1 TB Hard-drive
- Wi-Fi, 3G, Mesh, ADSL
- Peli carry case
- Toughbook PC's
- Colour or Colour/Mono Cameras
- LED IR's
- Additional External Cameras
- 12V Version
- COFDM & MESH Transmission

Feature List:

- Standard unit has 1 PTZ, 2 dome cameras and a covert 'polecam'
- Up to 25 fps as standard (option for 100fps)
- Shock Tolerant 320Gb Hard Drive (Maximum 1TB)
- Wi-Fi Connectivity – 802.11abg (WPA2 & AES Encryption)
- Optional 3G Remote Access Capability – Utilising Stryker's unique '3G Connectivity Safe Guard' feature
- Designed for Internal and External use
- Motion Detection & Smart Search
- Time and date search facility
- Stryker Control and Recording Software – incorporating Stryker's 'MultiView Technology'
- Broadband Internet Accessible
- Direct Ethernet Connection (waterproof)
- Mains operated (12V option available)
