

## Housing Estate CCTV by Stryker

### Stryker Helps Nottingham In Its Battle Against Vandalism

In response to significant vandalism to Council property, Nottingham City Council has deployed CCTV coverage on one of Nottingham's most notorious housing estates.

The potential sensitivities surrounding this deployment meant that a quick installation, with minimum disruption to residents, was required ~ this was one of the principal reasons why the Council selected Stryker's IRIS range of wireless cameras for the project.

To cover the small housing estate six Stryker cameras have been installed, the IRIS MICI version (incorporating a Forward Vision MICI400 dome camera) having been selected for added strength and resilience, with the unobtrusive integral enclosure of the IRIS cameras housing the dome camera, real time wireless video transmission system and antennae.
