

Stryker Announces System Health Review, COFDM Digital Transmission Trials & 'Trade-In' Plan

Is your wireless CCTV System really working for you ?

Many users of Mobile CCTV equipment currently experience poor levels of system performance.

At Stryker we offer a range of services to users of **all types of wireless mobile CCTV surveillance equipment** and are dedicated to providing exemplary levels of customer service and delivering real value for money.

Will Stryker assess my current wireless CCTV system free-of-charge ?

Yes. The Stryker team has many years experience of wireless CCTV systems and their operational deployment. We are able to assess your existing equipment **including MEL, Petards, WCCTV and other wireless products** and provide advice on ways of improving its performance.

Can Stryker look after my current wireless camera equipment ?

Yes. Repairs and ongoing maintenance for your MEL, Petards and **other manufacturers' mobile CCTV kit** is available on a basis that suits you. This can be as flexible as a simple ad-hoc repair (ie parts, materials and labour only), a one-off equipment service or as part of a more structured maintenance agreement.

My current mobile kit no longer meets my requirements. How can you help ?

Stryker offer a range of upgrade options to enhance the functionality of existing equipment, including the addition of digital video recording and upgrades to both analogue and digital transmission equipment.

A N N O U N C E M E N T

What options do I have if my equipment can't be upgraded ?

If upgrading existing equipment is not a viable option, we offer an attractive 'trade-in' plan against any other manufacturers' product when upgrading to in the Stryker IRIS wireless CCTV range.
